Preface

The following conventions are used in this document:

Bold	Used for information that is typed, pressed, or selected in executables and instructions. For example, select connect to host .
<i>Italics</i>	Used for file names, directories, scripts, commands, user IDs, document names, and Bibliography references; and any unusual computerese the first time it is used in text.
<u>Underline</u>	Used for emphasis.
Arrows <>	Used to identify keys on the keyboard. For example <Return>.
“Quotation Marks”	Used to identify informal, computer-generated queries and reports, or coined names; and to clarify a term when it appears for the first time. For example “Data-Generation Report.”
Courier Font	Used to denote anything as it appears on the screen or command lines. For example <code>tar xvf dev/rmt/3mm</code> .
Capitalization	Used to identify keys, screen icons, screen buttons, field, and menu names.

1. Software Version Description

1.1 Scope

This Software Version Description (SVD) contains a description of the Netscape Enterprise Server (NSENT) segment for the Defense Information Infrastructure (DII) for Windows NT-based machines.

1.1.1 Identification

Segment Name:	Netscape Enterprise Server
Segment Type:	COTS
Prefix:	NSENT
Home Directory:	<i>C:/h/COTS/NSENT</i>
Required License:	Netscape Enterprise Server License
Version Number:	1.0.0.0/3.0
Platform:	Intel PC with Windows NT 4.0

1.1.2 System Overview

- Purpose:** NSENT provides the end-user with the ability to organize and publish documents from the desktop with a web publishing interface; use text searches and revision control to manage content; create pre-defined agents that run on the server and return information (i.e., e-mail notification that a specific document has changed); store users and groups in a centralized directory; establish encrypted and authenticated transactions between clients and the server through the Secure Sockets Layer (SSL) 3.0 protocol; and can protect confidential files or directories by implementing access control by username, password, domain name, or IP address.
- Usage:** NSENT provides Web publishing, agents, lightweight directory access protocol (LDAP) support, encryption, and access control.
- References:** “Netscape Enterprise Server - Administrator’s Guide (NT)” from Netscape Communications Corporation (accompanies each licensed copy of the Netscape Enterprise Server). On-line documentation accompanies the software, and additional documentation can be downloaded from Netscape at <http://www.netscape.com/>.

1.1.3 Product Information

Product Qualification: NSENT has been approved for delivery by the DII Engineering office.

Product Restrictions: DISA purchased a 95,000 person user license for each of the SuiteSpot servers. Thus, as long as fewer than 95,001 users are being served, DISA can deploy an unlimited number of Netscape Enterprise Servers. This product can not be distributed to foreign countries.

Product Dependencies: This segment requires that the commercial off-the-shelf (COTS) product, Netscape Enterprise Server, has been installed on the target computer before the segment is installed. If the incorrect version of Netscape Enterprise Server is installed, the installation will terminate.

2. Referenced Documents

This and other segment documentation provides segment description and installation instructions. User administration and usage is provided in the Netscape Enterprise Server Administrator's Guide for Windows NT. Further information about this product can be obtained from the Netscape Communications Corporation web site at:

http://search.netscape.com/comprod/server_central/product/enterprise/index.html.

This page intentionally left blank.

3. Version Description

3.1 Inventory of Material Released

Two 3.5" diskettes comprise the software delivery. One is labeled "1 of 1; master" and the other "1 of 1; backup." Each tape contains NSENT in "MakeInstall" format. Also included in the delivery are 3.5" floppy disks containing the delivery documentation.

3.2 Inventory of Software Contents

The software delivered is "Enterprise Server, Version 3.0" as produced by Netscape Computer Communications, Corporation.

3.3 Changes Installed

Not applicable.

3.4 Waivers

The following delivery documents have been waived by the DII Engineering Office: Software Requirements Specification, Database Design Document, System Administrator's Manual, Software User's Manual, Operator's Manual, and Software Test Plan.

3.5 Adaptation Data

Not applicable.

3.6 Installation Instructions

Installation Instructions for this segment are provided in a separate document. The segment requires 1KB of disk space and 32 MB of RAM.

3.7 Possible Problems and Known Errors

None.

This page intentionally left blank.

4. Notes

None.
